**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. After reconsideration, the "objected to" status of claim 15 is hereby withdrawn.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 12-21 and 23-29 rejected under 35 U.S.C. 103(a) as being unpatentable over Takita et al. 5,051,183) as set forth in the previous Office action in view of Asami et al. (4,174,426). At column 9, line 50 to column 10, line 12, Asami et al. teach the aspect of treating a formed membrane with a solvent at temperatures which may range up to the boiling point of the solvent. It would have been obvious to one of ordinary skill in the art to incorporate this aspect taught by Asami et al. into the method of Takita et al. in order to change the physical characteristics of the membrane, for example by swelling the membrane. It would have been obvious to one of ordinary skill in the art to use a hot solvent for this treatment step since it is disclosed by Asami et al. at column 10, lines 9-12 that treatment times can be shortened by heating the solvent. Claim 15 was included under this ground of rejection since it appears that the membrane of Asami et al. did not contain a substantial amount of residual solvent when treatment was initiated.

4. Claims 22 and 33 are allowed.

5. Applicants' arguments filed September 10, 2007 have been fully considered but they are not persuasive. Applicants' arguments are considered to be moot by the examiner based on the revised ground of rejection introduced in this Office action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on (571) 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
